About the Company

High Values advisory was established in 2013. It specialized in sustainability management and assisted international corporations, SMEs and institutions in integrating sustainability into strategy, internal policies and external dialog. Along with fast-changing global economy and responding to our Clients needs, High Values has evolved into an ESG, impact and sustainability consultancy.

Today we help business, finance, and policy professionals better evaluate assets and report on sustainability performance. Our sustainable finance services enhance ESG and impact investing, risk management, corporate strategy and impact ventures. We also assist academic and research institutions in developing courses in sustainable finance and ESG/SDGs data analysis.

The High Values team has extensive international experience. Thanks to our multi-disciplinary expertise in finance, sustainability management, ESG integration, data analysis, corporate engagement, impact strategy and high-level EU policy, we serve best to our Clients. Our Clients, in turn, take full advantage of ESG insights and sustainability disclosure.

High Values provides 3 sustainable finance services:

1. ESG Insights & Integration
2. Impact Assessment & Strategy
3. Sustainability Engagement & Reporting

1. ESG Insights & Integration

ESG data insight is the baseline for sustainable investing. It reflects the company ESG/sustainability performance and related risks. Integrating ESG into investment decisions helps to identify risks and seize opportunities at an early stage.

High Values provides ESG insights and briefs, identifies and monitors financially material ESG risks, and assists the process of ESG integration into investment decisions. We also support asset managers in selecting of ESG indices and ratings as well as their interpretation. We assist you in:

- Company ESG risk & performance reports
- ESG peer benchmarking briefs
- ESG sectoral, country, regional briefs
- ESG indices/ratings selection and interpretation
- ESG integration into investment strategies

For whom

Asset Managers

Investors

Insurance Providers

Sustainability Leaders

Policy Makers

Advantages

- ESG-related risks reduced
- ESG opportunities identified
- Risk-adjusted returns improved
- Internal ESG management supported
- EU policies mainstreamed

2. Impact Assessment & Strategy

Impact assessment is key for managing impact investment portfolios, and evaluating companies' performance and programs. Investors show growing interest in opportunities bringing value and contributing to the UN Sustainable Development Goals (SDGs).

High Values offers an assessment of socio-environmental impacts at the early phase of an investment. We also assist start-ups and new ventures in integrating positive socio-environmental impacts and SDGs into their core. As a result, new ventures become more attractive to prospective responsible investors. We assist you in:

- Company impact assessment
- Impact portfolio assessment
- Policy and programs impact assessment
- Integrating impact/SDGs in venture's early stage

For whom

Asset Managers
Investors
Venture Capital
Start-ups
Foundations
Policy Makers

Advantages

- Impact investment opportunities identified
- Risk-adjusted returns improved
- Impact venture identity enhanced
- Impact programs enhanced
- EU policies mainstreamed

3. Sustainability Engagement & Reporting

Engagement is an effective strategy to improve the company sustainability performance and increase the relative value of assets. Investors and asset managers, along with management boards, are increasingly involved in this process.

High Values emphasises direct dialog with a company. In the event of poor sustainability/ESG performance, we initiate a dialog and engage investees on behalf of investors. We also assist companies in preparing of integrated reporting, ESG metrics selection and interpretation, contributing to a better overall performance. We assist you in:

- Corporate engagement
- Sustainability/ESG policies design
- Integrated reporting (incl. sustainability)
- ESG reporting
- PRI reporting

For whom

Asset Managers
Investors
Sustainability Leaders
Policy Makers

Advantages

- Sustainability/ESG performance improved
- Corporate sustainability identity enhanced
- Corporate transparency enhanced
- Corporate reputation enhanced

Business Trainings & Seminars

High Values offers in-house and scheduled business trainings, and executive seminars in two locations: Zürich and Warsaw. We also assist academic and research institutions in designing courses on sustainable finance, ESG and SDGs data analysis.

For whom

Asset Managers
Investors
Insurance Providers
Sustainability Leaders
Compliance Officers
Policy Makers
